

## How's it going..

Posted by Kenballs - 2016/03/04 14:33

---

Not a new member but have never posted on here before (as far as I can remember). Just saying hello because I have something to sell that I was going to stick on ebay but I reckon someone on here would snap it up pretty quick so in order to adhere to the rules I have to post something before I try to sell it here.

For the record, I drive a 1994 turbo. Great car the mr2, doubt I'll ever sell it unless I need to fund a kidney or something equally as important :lol:

Ok so having looked at my profile it seems I have a very bad memory and I have indeed posted on here before... Sorry about that, ignore the first post :fail:

Alright Steve, I tried posting a picture there but I think I need to do a bit more research on how to do it properly..

---

I'm selling a Blitz Access ECU for a gen 2 turbo, I was told it was for a gen 3 like mine and didn't figure out why it wouldn't work until after I had it refurbished by Peter at Logic Automotive. He replaced all the components that are known to fail. He did the same for my standard ECU when it went belly-up and it's worked perfectly ever since, so he knows what he's doing.
