

Rev 2 parts compatible with Rev 3

Posted by Turlock - 2017/05/18 00:51

Hi, I'm Looking to get some parts off a turbo rev 2 being broken to fit my turbo rev 3
Anyone know if I'd have any problems with any of these?

From what I know there's very little difference bar the engine and brakes

Coilovers
Wheels
Bonnet
Front Bumper
Seats

Any help much appreciated

I dont see an issue with any of them except wheels, original rev2 rims are 14" and wont fit over rev3
brakes. So youd want 15"+

only the Rev1 cars had 14" wheels, rev2 onwards had 15"

I think Ryan on Facebook has a bonnet in black may be a bit far though.
