

Rev 2+ front brake calipers and mounting brackets

Posted by tony67 - 2009/09/23 17:35

As in title I'm looking for front brake calipers and mounting brackets from a rev 2/3/4. Im looking to upgrade my rev 1 setup. I intend to get new discs and pads so only need mentioned parts which must be working perfectly.

The camskill ones dont come with the mounting bracket, also my current calipers are in a bad way. Im not sure Id get my £100 deposit back in which case it'd get fairly expensive. I reckon there must be a set of rev 2+ calipers out there.
