

my new 18" wheels

Posted by Danmr2 - 2010/12/31 00:52

hey everyone, merry xmas by the way been a while since i was on this,

well as ye see i got new wheels, but i need new tyrs as for the ones on the wheels are too big,

there 235-40-18 and i need smaller ones but not sure wat ones would anyone know wat size wud be best to suit 18s on an mr2 ???

What kind of wheels did you get?

Is there no rubbing with 18's?

Tyre sizes would depend on the wheels themselves, but get wider tyres for the 2 rear tyres.

If your current tyres are 235-40-18, I would say try Front : 205-40-18 or 215-40-18; on the Rear : 245-40-18 or 245-40-18.

Also, heres a link for checking ideal tyre widths, depending upon the size of your wheels.

these are them guys, ah the 235/40/18 dont fit on it anyhow so i heed new tyrs cause those dont fit, and i

need lock nuts aswell,thanks for the reply guys.

€20. Brand new, never used. They don't fit my wheels. I paid €40.

It was a group buy, hence the good price.

They don't fit into the wheels! Sure when I get the car back we can meet up and you can take a look. They'll be nice on your as they match the colour of your wheels.
