The hoodies are nice. Not sure about the lights though :blush:

I think these are very detailed and I've yet to stumble across a model like it at any car shows :)

I bought a set of those lights before. They are nice and they work fine but for one small issue. The chrome frames or surrounds that fix the light unit into the pop up light assembly, don't quite fit over these lights too well. They need quite a bit of persuasion, I stretched mine a little. Once fitted, fine, they are just like a mm over sized all around.

Also make sure you buy from a seller that has Left Hand drive units or else the light pattern will be wrong and you'll fail the NCT and piss off oncoming motorists!
