

Wheel Arch Protectors?

Posted by dshamrock2000 - 2012/02/17 12:44

Hi All,

So after getting my Arches all rust free and re-sprayed i'm thinking is there any product I can get to protect the arches on the outside? My thinking is that if I get a stone chip or two then the bodywork could be inclined to rust, a stone chip on the bonnet is fine as you can get a pen to refill it but on curves lines it would stand out that bit more

=====

There is a stone chip protector clear vinyl ... we can plot it to shape ... They use it on the porsche 997 ...
