

V6 Soundbites- see if this will temp you

Posted by Briweekes - 2013/09/09 17:09

I went to watch some of the Cannonball Ireland cars passing thru near me, Killaloe a couple of weeks back, inadvertently got myself included in one of the event videos, mine is the last car right at the end of the clip (turn your speakers up and hear the lovely toyota V6 3VZ-FE engine doing its stuff):

There certainly were, some boring looking cars (eg BMW) IMHO that had incredible engines too (gagging to be whipped out and put in a mid engined rocket!). The F40 was mint, didn't get to meet the owner though, quiet compared to others. I love the bark of those Gallardo engines, makes me drool. I'm really pleased with how mine came out, it got me safely to Switzerland and back in May too, awesome V^, cruise or blast foot-to-the-floor, it does it all!
