

Part No's web site.

Posted by slipsliderg - 2010/03/09 20:37

This is the most useful website I have come across for my car in ages.

Use your frame no and it will give you all the part no's you ever need. I haven't used it to order anything yet. So if you are going to use it I suggest you talk the parts dept to let you look at the picture of what you are buying to be on the safe side.

Link removed at request of original site, PM me for details.

MODS: CAN THIS BE STICKIED PLEASE. :)

Oh and I want KC's from everybody especially Spanky :P
