Hey I'm Andy,  
I bought a rev4 jap na recently.  
Ive always loved mr2s and I used to own an aw11.  
glad to be here!

interests include any alien documentary, and I am converting a NSR 125 to run on electricity (30 horsepower peak dcpm motor).

it's white.  
I have leather door cards and leather and suede seats swapped in.  
Cusco strut braces front and back, and I have and LSD gear box and lightweight flywheel for it (but not in yet).  
after that a flocked dash, and a better radio or possibly android tablet in the dash.  
Possibly a small bit of sticker bombing :)  
I am not sure any further then that, just keeping it running and enjoying it!

That Ralph Ring stuff is mad.  
It's a bit far out for me but very interesting.
