Now just to clarify this isn't my car but I have seen it sitting for a while in a scrap yard and don't quite get why but any how it's a jap import n/a with around 70k on the clock...originally red I think...guys selling it for €600 that's a bargain even as a parts car! Looks totally stock....could be a nice car with a bit of TLC....anyhow give me a message and I can send you his number.
