

mkll shell

Posted by Kenballs - 2016/05/11 09:30

If anyone has, or knows someone who has a mkll shell, I'm looking for one. All I really need is the bonnet, front wings and everything forward of the front struts, so I don't care what condition the rest of the shell is in, or whether there's an engine or box. Unfortunately a woman pulled out in front of me and made a right state of the front end. If I was doing things sensibly I'd just buy another complete car but I refuse to let this one die. Thanks lads, I hope someone here can help me out, cheers.

Sorry to hear of the prang :(

You could try sending a PM to ST182r, he was working with a stock of MR2's at some point:
