I've 2 clear ones if you're still looking, better looking than yellow IMO.

Yeah still have them. The adjustment bolts aren't in great shape, then again i doubt anybodies are any different at this stage.

These appear to be quite rare i only see one for sale on ebay at £35. How does £60 (or 75 euro) sound for the pair including Paypal fees? Postage would be extra, though there's always the option of meeting up somewhere instead to do the deal, I live near Newry.

I've practically a complete car's worth of parts, so if you need anything else as well chances are i have it.

Joey
