

## Can someone tell me please

Posted by dazzler mk2 - 2017/01/03 17:15

---

Could someone please tell me if rev 3  
Turbo and NA break calibers are the same  
Also the alternator,  
Thanks

im pretty sure all 94+ mr2's have same brakes.  
alternators will plug and play with the wires but sometimes they can be slightly different and need the  
bracket that it bolts to, so if possible bring the bracket it bolts to aswel.

ya ... rev1 were smaller discs, all brake calipers and discs are the same from rev2 onwards, turbo uses  
the same as n/a.

These guys are very handy for MR2 parts, you could double check the part numbers etc on their website to be 100% sure:

<http://www.tcbparts.co.uk/>
