

Front radiator under tray?

Posted by b4ss - 2017/08/09 16:08

Hi,
Don't suppose anyone has a front radiator under tray knocking around - mine fell off on the M8 over the weekend :(
MR2 rev3..
Thank,
T

I had to replace one years ago on my car. I ordered one from GTS Chris in the UK, not sure if they're still around? anyway the one I received was a damaged repair. The securing cup had split out and been replaced with a glued in one - still worked ok. If you still have your undertray you might be able to repair it with a fibreglass repair kit from Halfords and some DIY?

AFAIK all of those trays are the same throughout all revs of MK2s. Could be wrong though.

Getting a part number seems hard - all the part number sites seem to be gone :(
Mine was dragged along the M8 so it is destroyed... I found one on ebay but it was 60lids - Main dealer should only be about that i am hoping..

hey Tony .. this site still works
http://www.japan-parts.eu/toyota/jp/1994/mr2/sw20-ajmzz/4_211120_005_/body/5304_front-fender-apron-dash-panel

I remember trying to get these from Totoya before and I think that they were about 70 per side, managed to get both from a breaker for 30.
