

Fog lights wanted - Not yellow

Posted by Juliuswws - 2018/10/18 02:09

Hi guys,

As the title says, I'm after a set or a passenger side fog light with usable mounting tabs. Not yellow.

Thanks

ebay mate - most of the clowns on there break the tabs on them which makes them pretty much worthless IMO.

I managed to get a set by going through all the "wheelnut breaking mr2" posts - messaged about 25 of them, one lad came back to be with pics and think I paid £55 for the 2 of them delivered and they were in mint condition. Prob as cheap to grab the pair of lights so you have a spare if the drivers side takes a hit

Thanks mate, never thought of the breakers on ebay. I will dig in.

Talking about clowns, got a guy on adverts, previously agreed on price and conditions before he removed it. I told him to be careful...MAN, he destroyed it with his drill...

Thanks again mate

log drill bit or a long screwdriver extension and one of those metal bits that fit inside - once drilled a

screw extractor in a deep socket with a nail in socket as a wedge

heres how I removed them "back in the day" - my work as well they added a guide
